SKILLS:

- HTML5
- CSS3
- JavaScript
- React.js
- Bootstrap

DETAILS

Budapest

1999. November 17.

PROFESSIONAL

I started Epicode's Front-End Developer Course in September, 2022, after realizing I could get paid for something I did as a hobby when I was younger, building small websites in my free-time. In the meantime I learned how to properly use different languages and frameworks, and I believe I gained a deep knowledge of these, therefore I am ready to **kick-off my career as a Front-End Developer,** creating and learning even more amazing things in the meantime!

SKILLS:

WORK EXPERIENCE

Office Assistant - November, 2021 – January, 2022

Amplifon Hungary Ltd.

Managed invoices to assist the accounting department, ordered office equipment and supplies.

Organized meetings, kept in touch with customers and shops around the whole country.

EDUCATION

EPICODE Global – September, 2022 – present

Currently finishing my studies as a Front-End developer, ready to take job offers and accept more challenges.

Széchenyi István High School – 2014-2019

High School Diploma
